

COLLECT HIGH-QUALITY SURVEY DATA ONLINE WITH CHILDREN AS YOUNG AS 6 YEARS OLD

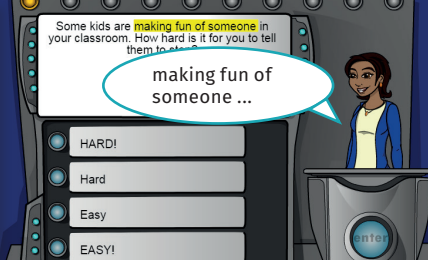

Developmental challenges in literacy, motivation, and attention can undermine the quality of your data:

- Limited attention spans and low motivation to answer survey questions make it difficult to collect responses.
- Reading literacy influences a child's ability to respond to questions and impacts the accuracy of those responses.
- Typical layouts, such as multiple questions presented one after the other, can distract and overwhelm children.

QUEST IS SPECIFICALLY DESIGNED TO ADDRESS DEVELOPMENTAL CHALLENGES!

We work collaboratively with researchers and educators like you to transform your traditional surveys into Quest online surveys for children.

<p>Game-like "Quiz Show" layout increases engagement & motivation</p> 	<p>Built-in text-to-speech removes literacy barriers</p> 	<p>Accessibility options increase focus & understanding</p>
