

Child-friendly online data collection system

Collect **high-quality survey data online** with children as young as **6 years old**

We work collaboratively with researchers and educators like you to transform your traditional surveys into Quest online surveys for children.

QUEST IS SPECIFICALLY DESIGNED TO ADDRESS DEVELOPMENTAL CHALLENGES!

Developmental challenges in literacy, motivation, and attention can undermine the quality of your data:

Voice-over removes literacy barriers

Reading literacy influences a child's ability to respond to questions and impacts the accuracy of those responses.

Game-like UI increases engagement & motivation

Limited attention spans and low motivation to answer survey questions make it difficult to collect responses.

Accommodations increase focus & understanding

Typical layouts, such as multiple questions presented one after the other, can distract and overwhelm children.

ALL QUEST SURVEYS PROVIDE:

- FERPA- & HIPAA-compliant data collection & storage
- Text-to-speech for all directions, questions, & response choices (with audio controls)
- One integrated system for completing one or more online surveys (with save & return capabilities)
- Easy export of data files for statistical analyses

CUSTOMIZABLE OPTIONS:

- Choose from a variety of "Quiz Show" layouts
- Apply synchronized highlighting, magnification, & other accessibility options
- Include mini-games to reward children for completion
- Include gamified counters to track progress & participant incentives
