

Quest Feature List

3C's Quest Platform offers an easy, developmentally appropriate, and secure method for collecting high-quality data with children aged 6–12 years, providing an unprecedented opportunity to give children a voice in clinical, social, and behavioral research. The Quest platform empowers researchers to execute all aspects of data collection, from survey creation to deployment to data export, and offers an array of other feature options for maximum customizability. Connect with us today to learn more!

Team Management

- **Unlimited user accounts** at your site/organization
- **Account control** – add, edit, and delete admin users as needed
- **Manage projects** – organize surveys into projects for easy management by different teams
- **Build surveys together** – share survey templates, audiovisual assets, and data codebooks with other team members
- **View results together** – share progress and data dashboards across team members

Security & Access Features

- **Electronic signature** – collect and record consent and other specified agreements from respondents electronically via checkbox option
- **Password protected surveys**
- **Inactivity timer** – automatically log respondents out after a pre-specified time of inactivity
- **HIPAA-compliant features**

Survey Builder: Basics

- **Survey starters** – start from a saved survey or survey template
- **All essential question types** – multiple choice, select all, slider, open-ended, date, matrix, and dynamic user-added choices
- **Custom response choice formatting** – radio button, checkbox, button, dropdown, image (vertical or horizontal displays)
- **Multi-media (images, audio, video)** question content and/or response choices
- **Question & survey logic** – skip and branch based on responses
- **Answer piping** – personalize subsequent questions based on prior responses
- **Multiple language support**
- **Preview** for mobile, tablet, and desktop display

Survey Builder: Advanced Functions

- **Drag & Drop question type** for categorization
- **Interactive multi-media menus and lists**
- **Question & survey logic** – skip and branch based on responses
- **Developmental accommodations** – masking, synchronized highlighting, and audio auto-play of instructions, questions, and/or response choices (see <https://core.quest4data.com/respond/core>)
- **Audio links** – link text to audio files for read aloud of instructions, questions, and/or response choices
- **Mini-games** – include brief, fun mini-games as breaks and rewards for respondents
- **Built in calculator popup**

Quest Feature List (continued)

Customized Look

- Custom labeling, titles, & tool tips
- Text formatting
- Add your logo
- Custom themes and colors
- Custom URL
- Tool tips – provide guidance, definitions, and tips to simplify on-screen text
- Display custom survey completion, thank you, or send respondents to a URL

Customized Respondent Experience

- Numbering
- Required response designation
- Progress bar displays
- Response validation with custom error message
- Allow or restrict editing of responses after submitting
- Personalized feedback for response choices (reinforcement or corrective)

Messaging

- Custom email and SMS messaging
- Preview messages
- Schedule delivery to respondents (such as on completion, not started by date)
- Track message delivery

Survey & Respondent Management

- Deploy surveys **anonymously** or to a known list of respondents
- Bulk upload respondent lists
- Set response quotas – define the target number of respondents
- Set survey open & close dates
- Track survey completion in real-time via online dashboard, including respondents' first and last logins
- Receive alerts (such as on respondent completion, when target met)
- Random assignment – randomize respondents to different groups based on survey responses
- Assign different surveys to different groups of respondents
- Recurring surveys
- Set max response count

Quest Feature List (continued)

Analysis & Reporting: *Basics*

- **Custom dashboard** for real-time results
- Customize display of **missing values**
- **Custom variables** – recode question responses into a new variable
- **Timing data** – automatic calculation of time spent completing each question and the entire survey
- **Visualize data** across all or sub-sets of respondents
- Generate **custom tables & reports**
- **Print** reports
- **Download results** as CSV

Analysis & Reporting: *Advanced Functions*

- **Codebook** – customize variable names, assign labels, recode variables, and tag identifying data
- **Formulas** – create a new variable that sums or averages across multiple questions

Support

- Dedicated **email** support
- **Phone** support
- Embedded **tool tips**
- **Customer Success Manager**
